WHAT IS Shelving Systems?

Shelving Systems a brand name for a stable of shelving products and Shelf Management solutions

It is a collection of products from various suppliers throughout Asia, that have been brought together to create a complete product range of metal shelving and accessories for many industries

Each product has been designed and refined to fit together quickly and easily without tools and complex assembly processes

If you wish to build it yourself, it's no harder than any IKEA product

The range is constantly growing and being improved so if you don't see what you are looking for we can design it for you.

The shelving product is available in various strengths and a huge variety of colours, plus some wood grain options. We can incorporate timber shelves or timber products to enhance the finished look depending on your requirements

If you want a custom product we have an in house design team that can take your idea and make it reality,
From concept to delivery.

There are many more standard fittings that are available for specific products that are not included in this catalogue but have been designed and ready to supply.
Whatever your display fixture needs, just try us.

We keep a large stock holding in Sydney and can ship nationally with our logistics partners. We can ship directly into your closest port and deliver to your door as efficiently as possible, depending on volume.

All our metal powder coated items are supplied with hard wearing Interpon Akzo Nobel powder coat for a great, hard wearing and long lasting finish

Shelving Systems is sold exclusively through Shop Supplies

ShelvingSystems

SINGLE SIDED SHELVING BAY

The Shelving Systems single sided Shelving system is designed to fit against a wall or as an end bay. It is completely free standing or can be mounted to the wall if required.

It comes in a variety of colours and sizes from 1200mm high through to 2400mm high. In widths from 600mm, 900mm, & 1200mm and shelf depths from 300mm to 600mm.

The post profile is 30mm x 70mm and the pitch is 50mm. Standard tube thickness is 1.5mm but thicker tube is available if you need a heavier duty system.

Metal shelves are provided with this system. The base shelf depth varies and the number of upper shelves is determined by the bay height.

Simple assembly is required.

Specifications		
Post	30mm x 70mm x 1.5mm	Cold rolled steel
Back panels	0.8mm	Flat punched or Volcano
Shelves	0.7mm	
Brackets	2.5mm	Multi Angle
Colours	Black/White/Hammertone	
Base Shelf height	195mm	Pitch 50mm

DOUBLE SIDED SHELVING BAY

The Shelving Systems double sided Shelving system is designed to be built as an aisle bay in the center of your store. It is free standing.

It comes in a variety of colours and sizes from 1200mm high through to 2400mm high. In widths from 600mm, 900mm, & 1200mm and shelf depths from 300mm to 600mm.

You might want to use a single sided bay or a feature end to finish of each bay run, from previous post.

The post profile is 30mm x 70mm and the pitch is 50mm. Standard tube thickness is 1.5mm but thicker tube is available if you need a heavier duty system.

Metal shelves are provided with this system and the base shelf depth varies and the number of upper shelves is determined by the bay height.

Simple assembly is required, Refer to our assembly instructions in the back section of this catalogue.

FEATURE END PANELS & KITS

A feature end panel is designed to go on each end of the aisle bay runs to finish it off. It is also know as an end cap.

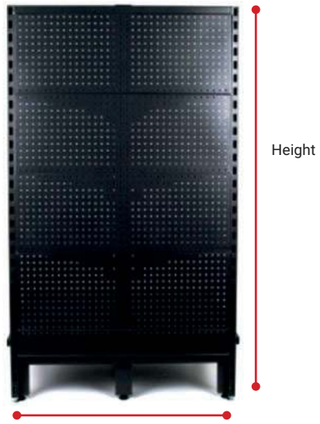
Shelving Systems feature ends are supplied in several different ways. Either as a complete unit fully welded with back panels, a kit item that requires assembly, or as a frame that requires back panels and a top cap.

It has a saddle type mount that drops into the center double post on each end and locks into the base leg. It then has adjustable feet to tighten against the floor.

You can then use this for hang sell with standard hooks to suit the back panels you have chosen or fit shelves to it. The welded and kit type ends use 30mm x 30mm tube and therefore can only take 2 hook type brackets

We have them in all size configurations to suit whatever bay size you have chosen.

Please note you need 2 hooks brackets per shelf if you are adding shelves to an end.



Specifications		
Post	30mm x 30mm x 1.5mm	Cold rolled steel

FEATURE END FRAMES

A feature end frame is designed to go on each end of the aisle bay runs to finish it off. It is also know as an end cap.

Shelving systems feature end frames allow you to choose whichever style or colour back panel you want and also require a top cap to complete the assembly.

It has a saddle type mount that drops into the center double post on each end and locks into the base leg. It then has adjustable feet to tighten against the floor.

You can then use this for hang sell with standard hooks to suit the back panels you have chosen or fit shelves to it. These frames have a 30mm x 50m tube and can take standard 3 hook multi angled brackets.

These frames are designed so you can add in back panels matching what you have selected in your shelving.

Back panels are required and not included.

CORNER BAYS

Corner bays are available to match your wall bays and they provide a seamless method of creating a 90 degree corner, fully utilizing the space

When installing a corner bay we recommend you start assembly at the corner and build out. They are available in our standard colour range in all standard sizing

You must consider the base shelf when ordering, as it needs to be the same depth as what you are using on the wall bays.

All corner base are add-on bays with one post only.

Upper shelves are optional

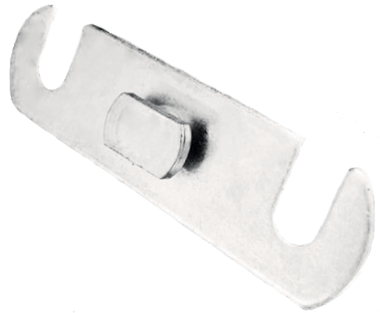
WALL MOUNT BRACKETS



Wall mounting brackets are used to slot into the rear of the post between the post and the wall. You twist the bracket 90° to lock into the post & fix it to the wall.

Suits all double punched posts.

Name	Type
SGWALLBKT	Wall Mounting Bracket for Gondola Posts

LOW LEG POSTS

The Shelving Systems Low leg post range is designed to have a low height base shelf. It is available in both single and double sided

It is a fully welded one piece unit and can be assembled using joiners or if you want to fit wheels to make it mobile you then need Tie bars instead.

Shelving Systems posts are a one piece welded post with a 30mm x 70mm tube profile and are 50mm pitch.

They have adjustable footplates which must be adjusted to make them vertical from the floor during installation. The feet can be replaced with wheels if required and are available separately. We do not recommend wheels on single sided bays

Available in white only, these are widely used in pharmacy

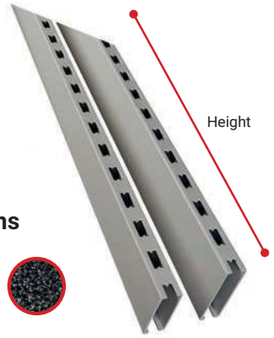
PUNCHED UPRIGHTS

As a variation to one piece welded posts, Shelving Systems offer a two piece equivalent that has the upright and the base leg supplied separately.

This assembles and replaces directly the one piece posts, but can be stored and shipped more efficiently

Shelving Systems posts uprights are a one piece tube with a 30mm x 70mm profile and are 50mm pitch. They are punched both sides to allow them to be supplied as a single or double sided version

They are available in all standard colours and sizes.



Color Options

Specifications	
Tube Depth	30mm
Width	70mm
Thickness	1.5mm - 2.5mm
Colours	Black/White/Hammertone
Pitch	50mm

SGPOST2100/BLK	2100	30 x 70	1.5	Black	Yes

CLIP ON BASE LEGS

Clip on base legs are the second part of the two piece post.

The base shelf depths varies and you can order as required,
so you order the colour and the depth you want, then order the upright to give you the height required
Very simple assembly is required and sometimes they need to be tapped into place as they are a tight fit.

Posts and clip on base are compatible with our standard posts.

METAL SHELVES

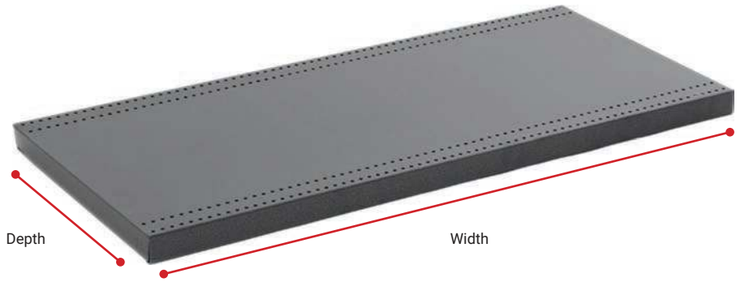
Shelving Systems metal shelves are available in a huge range of depths and our standard widths.

All standard colours are available.
There is a front and back to each self when installing and using our brackets, they lock in place at the front.

They are 0.7mm thick standard although are available in many other thicknesses up to 1.2mm if you require heavier duty shelves.

They have lateral supports underneath to prevent flex and provide support
Shelf height is 30mm and are designed to take our standard 26mm data strip range.

Color Options



Shelves require 2 brackets each

WIRE SHELVES

Wire shelves are finished with a hard wearing zinc plating, which is a similar but much more environmentally friendly and cost effective solution to chrome plating.

They use standard brackets and mount the same way. Standard sizing is available.

They have a small channel on the front lip to allow for a drop in acrylic front fence if required.

Name	Width	Depth	Colour
SGWS300	900	300	Zinc

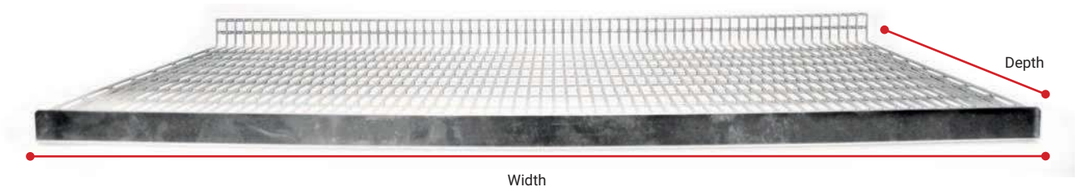
SGWS900/600	900	600	Zinc



SHELF BRACKETS

Shelving Systems shelf brackets are a heavy duty stamped unit, using 2.5mm thick plate as standard, although heavy duty versions are available.

They are available in either a one position (Flat) mount, 2 hook/2 position type or 3 hook/3 position type.

Multi Angled brackets are designed to be fitted flat, then 15 degree angle down for 2& 3 hook, then 30 degree angle down for 3 hook only.

You need to order the bracket length to match the shelf depth you are ordering.

They have a locking mechanism at the front of the shelf and the back of the shelf to hold the shelf in place. This also stops the front edge of the shelf lifting up if knocked.

All standard colours and sizes are available.

VOLCANO PUNCHED PANELS

Shelving Systems Volcano punched Back panels are our standard type. They are also known as dimple panel and each punched hole is recessed inwards 5mm, which provides lateral strength and looks great.

They are installed the same way and are 0.8mm thick. See our back panel configuration chart on what is required depending on bay height.

PLAIN BACK PANELS

Shelving Systems plain back panels look clean and neat if you are not using hang sell, and only shelves. They are 0.8mm thick.

They are installed the same as all our back panel range and are slightly cheaper than the punched versions.

These are widely used in pharmacy.
Back panel styles can be mixed and matched if required.

Color Options

TG BASE FOR FEATURE ENDS

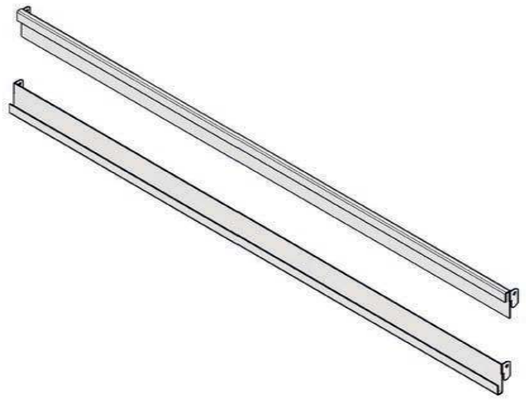
TG bases are a metal plinth that is placed in front of the feature end panel to match a base shelf. It is not connected & sits directly on the floor.
they are available for 600mm & 900mm wide panels

Name	Height	Width	Depth	Footprint	Colour
SGTG9045	190	900	450	900x450	White
SGTG6030	190	600	300	600x300	White

SIGN HOLDER CHANNELS

Sign holder channels are supplied in pairs. (top and bottom) and clip into any punched hole and allow you to slide in a sign anywhere on the back panel
The sign panel can be any height in increments of 50mm

This is a very cost effective solution



TOP CAPS

Top caps are required for all double sided or single sided bays that are 1800mm or below. They fit neatly across the middle of each bay covering the gap between the posts and are designed for aesthetic purposes only.
Order the same length as the shelves and back panels.

Name	Width mm	Length mm	Colour

Color Options

JOINERS

Joiners are not structural and can be left out. However they do make assembly much easier as you can build the entire bay run using joiners, allowing you to move it and slide it into place, which gets more difficult when the back panels and shelves are fitted because of the weight.
Top and bottom joiners supplied with each bay. These are not seen once the back panels are fitted

Name	Width mm	Colour

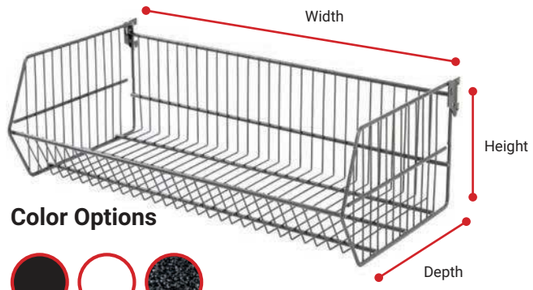
WIRE BASKETS

The Shelving Systems wire basket range is a great solution to displaying larger light products like balls or towels. It has a large capacity and sides to hold the product in place. Basket dividers are available to separate different products.

They are supplied flat and fold out and lock in place.

These require Specific basket type brackets shown in the table below.



Specifications	
Wire Thickness	3.5mm & 5mm

SLIDING STORAGE DRAWERS

The Shelving Systems storage drawers are a great idea for storing excess product right where you want to display it. It makes restocking easier and utilizes otherwise wasted space beneath the base shelf.

They come with 4 small metal wheels and are guided into place by the inside of the base leg. They push into place neatly below the base shelf.

Sizing is limited and these sometimes may be a special order item.

FRONT FENCES & SHELF DIVIDERS

Wire shelf dividers are available for metal shelves.

They simply clip into the holes on the shelves and stand vertically in place separating product and keep it in-line.

Front fences are also available for both metal and wire shelves which clip into the front edge of the shelf to stop product falling off the front. It will also allow you to angle the shelf forward while keeping the product in place.

Fences and dividers are available for all our standard shelving range.

Acrylic front fences are available which suit wire shelves and some metal shelves.

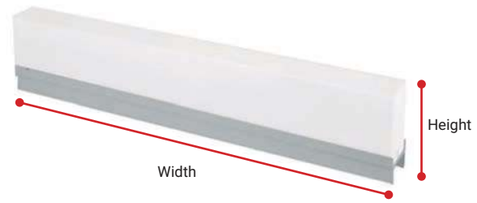
SIGNHOLDER7	Single Panel Sign Holder with top and bottom tracks	350	900	White

AISLE LIGHT BOX

The aisle light box assembly is designed to replace the top cap and simply clips over the back panels and sits in place.

It has a removable acrylic box that can have signage applied to it.

Lighting is not supplied but is available if required



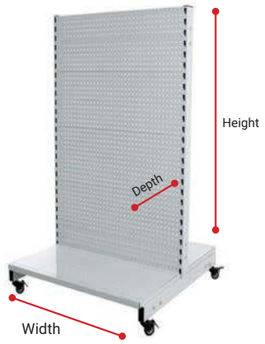
Name	Description	Height mm	Length mm	Colour
40-40600	Single Panel Sign Holder with top and bottom tracks	400	900	White
40-40900	Single Panel Sign Holder with top and bottom tracks	400	900	Hammertone

LOW LEG GONDOLA SHELVING BAY

Low leg gondolas have a much lower base shelf level than our standard range, which is the main difference.

They can also be bolted together using tie bars and have wheels fitted allowing for full mobility.

These are common in pharmacy applications. The sizing is limited with these so please see the table for dimensions.



Specifications		
Post	30mm x 70mm x 1.5mm	Cold rolled steel
Back panels	0.8mm	Flat punched or Volcano
Shelves	0.7mm	With 2 or 3 rib support
Brackets	2.5mm	Multi Angle
Colours	Black/White/Hammertone	
Base Shelf height	195mm	Pitch 50mm

Color Options

WHEELS AND TIE BARS

Heavy duty casters are available to suit low leg posts. The adjustable feet are simply un screwed and removed then replaced by the wheels.

You must order tie bars instead of joiners if you are using wheels. All wheels are lockable.

Tie bars are bolted in to keep unit rigid.

Name	Type	Qty.	Length	Colour	Type

RETAIL DISPLAY LONGSPAN

Shelving Systems longspan looks great in any retail application.

It is perfect for heavy product such as dog food, or liquor. It is available in black and white in and a variety of size options.

It is supplied with either wire drop in shelves or MDF edged shelves. It is very simple to assemble and is extremely heavy duty.

It is supplied in component form so shelf levels can be determined by you.

The punched holes for clipping in the beams are at the rear of the frame so are not visible from the front, which gives it a clean finished look.

SHELVING SYSTEMS DATA STRIPS

DATA STRIPS

Complete your shelving display with affordable, durable and essential shelf edge pricing. Our data strips are available in a convenient variety of lengths, to suit your store's shelf profile and in a range of colours. Forget about having to deal with messy adhesive price labels - our data strips easily allow a printed paper strip to slide in and out, so you can readily and easily change pricing, mess-free. We offer a variety of styles to suit any budget or preference.
